Order/Tender View

Powerfully Simple, Powerfully Quick

RSenCounter® MW

With today's fast paced lifestyles, people expect speed of service, especially at the Point of Sale. The NEC RSenCounter MW will speed up the order process and assist with accuracy, while streamlining operations to improve your customers dining experience and your bottom line.

Additionally, the RSe MW can help manage your business by offering enhanced operations like time and attendance that will assist in allocating resources, improved food cost management through inventory control and pricing integrity by scheduling changes to take effect as necessary. NEC combines ease of use and flexibility to make this a solution that will provide you with peace of mind in your daily business.
