

Panasonic

System Manager Pro Software Suite – Special Features

Panasonic's System Manager Pro Software Suite... Versatile, Innovative, Reliable.

New, exciting features are constantly added to Panasonic's System Manager Pro (SMP) Management Software Suite. The latest additions include a Remote Price Manager, Wireless Alerting, SMP Security, Labor Scheduling Assistant, and Fingerprint Login. Panasonic's SMP is constantly being updated to provide additional unique and innovative features to help you manage your daily business more efficiently and effectively than ever.

Remote Price Manager

The Remote Price Manager feature of Panasonic's Corporate System Manager Pro (CSMP) software suite allows you to manage pricing for all of your stores from a single, remote location.

- The Remote Price Manager allows pricing to be manipulated by individual store, for all stores, or even regionally.
- Need to increase a menu item by 10% in all of your stores? The Remote Price Manager makes it easy to modify pricing incrementally using the exact dollar value change or percentage.
- Great for regional customization, the Remote Price Manager allows you the flexibility to change your pricing structure to match the individual market needs of each store or to implement limited time offers and promotions.

Store	Store Name	Plu Description	Price 1	Price 2	Price 3	Price 4
.10	REGION_level2a	PLU NOT FOUND

2128	Store 2128	DIETCOKE	\$1.00	\$0.00	\$0.00	\$0.00

Change the price of a menu item remotely for your entire portfolio of restaurants with the click of a button.

Wireless Alerting

The Wireless Alerting feature of Panasonic's System Manager Pro (SMP) software suite allows communication of system critical information via your manager's headset and/or email account. The Wireless Alerting feature also allows smart greeting in your drive-thru whereby the customer is instantly greeted with a prerecorded message that matches the voice of the cashier logged on to the drive-thru register.

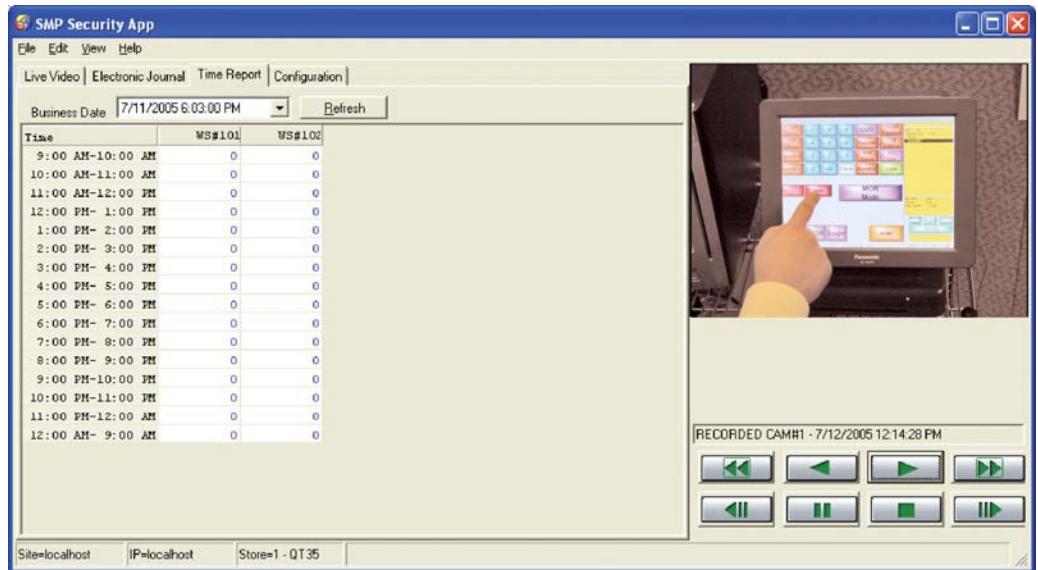

- Keep a close eye on your business with the Wireless Alerting feature of System Manager Pro. Receive instant communication via your manager's headset and/or an email when a cashier rings a void or other important activity is logged at the counter.
- Wireless Alerting keeps you informed on important financial activity in your restaurant by allowing you to have periodic reports sent via email or played over the manager's headset.

Your drive-thru cashier can easily prerecord an appropriate automatic customer greeting that matches his/her voice.

SMP Security

SMP Security links the Panasonic Closed Circuit Television (CCTV) to your electronic journal allowing you to look up specific transactions and see the corresponding video.

- SMP Security allows you to call up specific transactions using various search criteria such as VOIDS, PLUs, Coupons, Cashier on Duty, and more. Then, the system matches the electronic journal entry to the CCTV footage corresponding to that transaction, allowing you to audit and monitor all POS workstation activity.

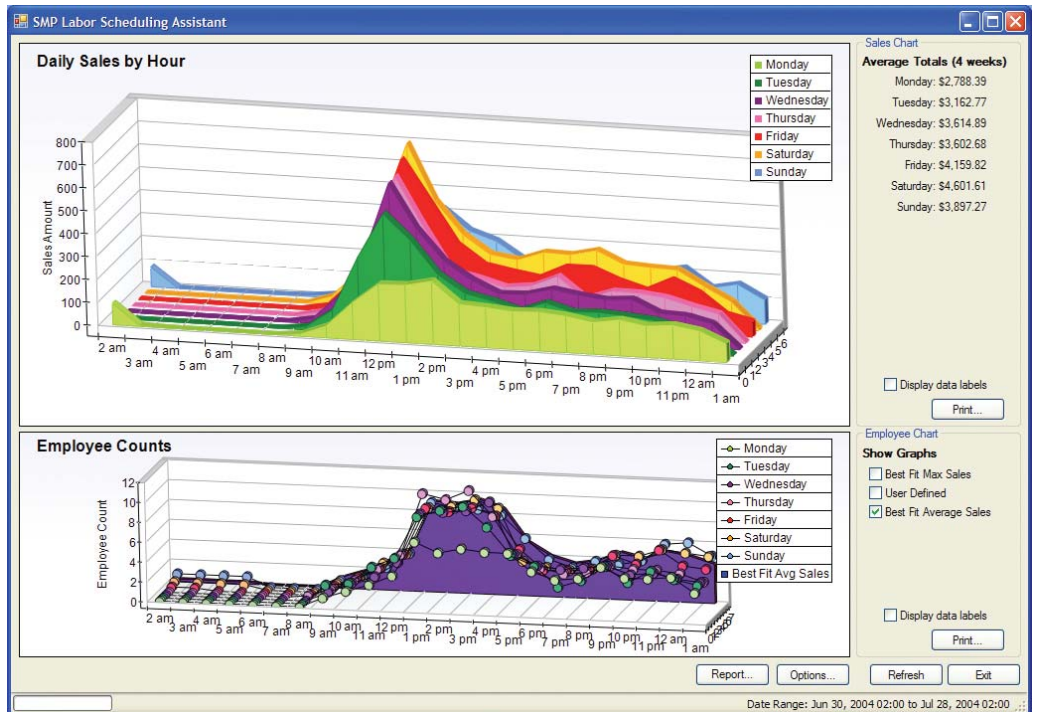

Link your Panasonic CCTV system to your SMP electronic journal and actually see your employee ringing an order from both the POS side, and the security side simultaneously.

Labor Scheduling Assistant

The Labor Scheduling Assistant helps you strategically manage your labor force using historical sales data. Save money and increase customer satisfaction by appropriately staffing your restaurant with the help of the Labor Scheduling Assistant.

- Calculate your historical hourly sales and headcount to help more accurately predict and plan labor schedules.
- An easy-to-view graphical report allows you to see sales and labor over a given time range, along with suggestions for employee counts for scheduling purposes.

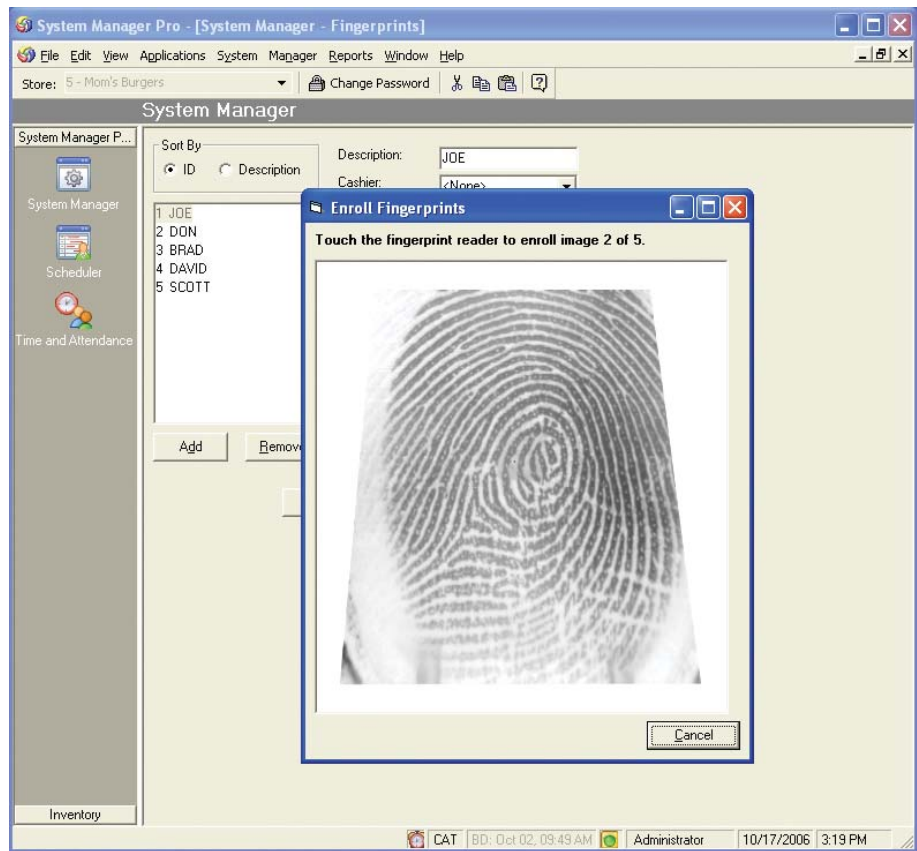

View daily sales by hour in order to help anticipate your required employee count for a specific daypart.

Fingerprint Login

With the Fingerprint Login feature your staff can securely and conveniently logon to a workstation with the touch of a finger.

- No more lost keys or forgotten access codes - with the Fingerprint Login feature your staff will always have the ability to quickly and easily login to the register system.
- Never worry about your login codes or keys getting into the wrong hands. The Fingerprint Login feature ensures that only your designated staff members are able to login to the system.

The simple touch of a finger can safely and securely login your employees to the workstation.

The released features listed in this document and the timing of these releases are subject to change.
