

## Reduce paper and energy costs with Epson's TM-H6000IV!

Get the printer that can help you cut your costs. Epson's best-selling TM-H6000IV multifunction printer is ENERGY STAR® qualified, has the lowest power consumption in its class and offers print options that can reduce paper usage for receipts up to 30%, saving you over \$300 in five years.

### Paper savings are easy with no application changes required

Epson's TM-H6000IV paper-saving options allow you to reduce the white spaces on your receipts from 25% to 75%, which means a paper savings of up to 30%. The paper-saving settings are easy to use and can be done right out of the box without changes to your application.<sup>1</sup>

### Quality and readability assured

Other POS printers claim to reduce paper usage by up to 70%, but look closer. They achieve reduction by compressing both text and graphics, reducing font size and requiring a change from 80mm to 58mm receipt paper, all of which make their receipts much harder to read. Epson's TM-H6000IV, using standard 80mm receipt paper, reduces paper usage by reducing the white spaces and lower margin on the receipt so that print quality, readability and font size are not affected.

### Benefit from significant cost savings

With the TM-H6000IV printer set at the full 75% reduction mode, paper costs can be reduced by over \$300 per

printer in five years with a savings of over 200 lbs of paper. For users with 1000 printers, this could mean a cost savings of over \$300,000 in five years.

- Industry-leading 99.9% MICR accuracy
- Fastest check processing in the industry
- Superior slip handling with built-in forms stopper

### FIND OUT HOW MUCH YOU CAN SAVE!

Ask an Epson representative for a customized ROI report showing how much you can save with Epson's TM-H6000IV.

### Save even more with TM-H6000IV's low energy consumption

The TM-H6000IV multifunction printer is ENERGY STAR qualified<sup>2</sup> and is the most energy efficient in its class. In power consumption tests conducted by Epson on multifunction printers sold in the United States, including NCR and IBM, the TM-H6000IV was found to use between 81% and 84% less power than other printers in its class.<sup>3</sup> In addition, the TM-H6000IV's low power consumption reduces the creation of CO<sub>2</sub> over the life of the printer.

### Epson and the Environment

Epson is committed to helping you meet your environmental goals and reducing your costs. Epson has a long history of achievements in protecting the environment and is now one of the leading environmental companies in the world. Our products are built with exceptional energy-saving designs, high recyclability and long life spans using strict manufacturing processes. All of which adds up to products with smaller environmental footprints and more cost savings for our customers.

<sup>1</sup> Even greater paper savings can be made with an application software adjustment.
