

R3000

Connected Coin and Bill Counter

RETAIL, FOOD SERVICE AND GROCERY INDUSTRIES BENEFIT FROM A SIMPLE, CONNECTED CASH COUNTING SOLUTION. FASTER AND MORE ACCURATE THAN HAND COUNTING AND RECORDING, R3000 COMBINES CASH RECONCILIATION FOR COINS, BILLS AND VOUCHERS WITH SIMPLE REPORTING TO A PC.

The R3000 is designed for straight-forward record keeping and reporting of cash management. It can be connected to a PC via USB and will send simple report data into a word processing document or a spreadsheet.

Faster, automated counting and recording reduces errors and increases the quality of the audit trail. More regular counts can be undertaken to improve the available data that management has for analysis. The information can then be used for planning cash deliveries or collections, identifying business trends and eliminating discrepancies.

Cash register close-outs, start-bank and deposit preparation and cash drawer audits are all processes that can be undertaken automatically on the R3000 using custom set-up count tasks.

"Installing Tellermate has radically improved and simplified our cash management, and has increased cash reconciliation speed and accuracy. Cash is better consolidated and the power of integration has given us cash visibility and audit ability."

The Ti^x range of products have been designed with performance and ease of use in mind.

LARGE DISPLAY: Large, high resolution backlit display enables the use of larger text and clear icons. Screen layout is ergonomically designed for quick and easy operation.

INSTINCTIVE MENU STRUCTURE: Addition of a 'Home' key for fast, main menu access, header text and scroll bars for clear navigation.

INTUITIVE DESIGN: The large display combines with the familiar navigation keys and user software to provide an intuitive, easy to operate user interface.

SOPHISTICATED COMMUNICATIONS: A range of connectivity options are available that provide flexible and comprehensive solutions for all application needs.

INTEGRATED KEYPAD: The Ti^x is also available with front of unit keypad integration for quick data entry and soft touch design key caps for reduced vulnerability to damage.

DAMAGE-RESISTANT DESIGN: Designed for durability, the unique and robust features of the Ti^x reduce damage through impact. Liquid-resistant key mat and drainage lines minimize effects of accidental liquid spills.

FEATURES OF THE Ti^x R3000 :

- Counts bills, coins, coupons and tokens
- Four customizable bank values
- Full closeout summary
- Banking mode checks rolls and straps
- High capacity money platform
- Print reports to PC
- Connect to a Tellermate printer for mini reports
